

Dyyni

MODULAR SOFA SYSTEM

Design Tapio Anttila

By combining elements of the Dyyni modular sofa, you can create classic, expressive and functional solutions for lobbies, meeting rooms and other designs destinations.

Dyyni is built around a one, two or three-seater sofa base, on which frame components are arranged and then complemented with backrests and armrests. Use the components to create attractive seating arrangements to suit each particular room and its specific purpose.
