ISKU

Product name:	Kivikko (12 pcs)
Product type:	Lounge system
Item number:	237527
Total emissions (Cradle-to-Gate):	64.5 kg CO ₂ e
Total emissions (Cradle-to-Grave):	82.6 kg CO ₂ e

Fabric used in the calculation: **Cura** (98% recycled polyester, 2% polyester) **31.29 kg CO₂e**

Alternative fabrics:

Steelcut Trio 3 (90% wool, 10% nylon) **262.12 kg CO₂e**

Recycling Instructions

ISKU has designed the product so that the metal parts of the product can be easily removed and recycled in metal collection. Packaging materials (cardboard and plastic) are recycled in cardboard and plastic collection. The rest of the product is assumed to go into mixed waste.

The calculation has been carried out according to ISO 14067 by Green Carbon.

* The emissions of alternative fabrics have been estimated based on the weight of the fabric used in the calculation. In reality, the weight of the alternative fabric may be different, which affects the actual emissions. However, this assessment provides guidance in the comparison between fabric materials.
