# ISKU

Product name:	Rudolf 3206 (seat upholstery)
Product type:	Chair
Item number:	206538
Total emissions (Cradle-to-Gate):	28.1 kg CO <sub>2</sub> e
Total emissions (Cradle-to-Grave):	36.0 kg CO <sub>2</sub> e

### Distribution of emissions

Total emissions 36.0 kg CO<sub>2</sub>e

Fabric used in the calculation: **Cura** (98% recycled polyester, 2% polyester) **0.59 kg CO<sub>2</sub>e**

Alternative fabrics: \*

**Steelcut Trio 3** (90% wool, 10% nylon) **4.98 kg CO<sub>2</sub>e**

### Recycling Instructions

ISKU has designed the product so that the metal parts of the product can be easily removed and recycled in metal collection. Packaging materials (cardboard and plastic) are recycled in cardboard and plastic collection. The rest of the product is assumed to go into mixed waste.

The calculation has been carried out according to ISO 14067 by Green Carbon.

Product name:	Rudolf 3206 (upholstered)
Product type:	Chair
Item number:	206540
Total emissions (Cradle-to-Gate):	28.6 kg CO <sub>2</sub> e
Total emissions (Cradle-to-Grave):	36.2 kg CO <sub>2</sub> e

### Distribution of emissions

Total emissions 36.2 kg CO<sub>2</sub>e

Fabric used in the calculation: **Cura** (98% recycled polyester, 2% polyester) **2.26 kg CO<sub>2</sub>e**

Alternative fabrics: \*

**Steelcut Trio** (90% wool, 10% nylon) **18.96 kg CO<sub>2</sub>e**

### Recycling Instructions

ISKU has designed the product so that the metal parts of the product can be easily removed and recycled in metal collection. Packaging materials (cardboard and plastic) are recycled in cardboard and plastic collection. The rest of the product is assumed to go into mixed waste.

The calculation has been carried out according to ISO 14067 by Green Carbon.

Product name:	Rudolf 3206 (chair with loop legs, no upholstery)
Product type:	Chair
Item number:	206537
Total emissions (Cradle-to-Gate):	25.4 kg CO <sub>2</sub> e
Total emissions (Cradle-to-Grave):	32.9 kg CO <sub>2</sub> e

### Distribution of emissions

Total emissions 32.9 kg CO<sub>2</sub>e

#### Recycling Instructions

ISKU has designed the product so that the metal parts of the product can be easily removed and recycled in metal collection. Packaging materials (cardboard and plastic) are recycled in cardboard and plastic collection. The rest of the product is assumed to go into mixed waste.

The calculation has been carried out according to ISO 14067 by Green Carbon.

Product name:	Rudolf 3209 (wooden legs, upholstered)
Product type:	Chair
Item number:	206644
Total emissions (Cradle-to-Gate):	27.1 kg CO <sub>2</sub> e
Total emissions (Cradle-to-Grave):	34.7 kg CO <sub>2</sub> e

### Distribution of emissions

Total emissions 34.7 kg CO<sub>2</sub>e

Fabric used in the calculation: **Cura** (98% recycled polyester, 2% polyester) **2.26 kg CO<sub>2</sub>e**

Alternative fabrics: \*

**Fame** (95% wool, 5% polyamide) **26.04 kg CO<sub>2</sub>e**

**Linetta** (100% polyester) **3.10 kg CO<sub>2</sub>e**

### Recycling Instructions

ISKU has designed the product so that the metal parts of the product can be easily removed and recycled in metal collection. Packaging materials (cardboard and plastic) are recycled in cardboard and plastic collection. The rest of the product is assumed to go into mixed waste.

The calculation has been carried out according to ISO 14067 by Green Carbon.

\* The emissions of alternative fabrics have been estimated based on the weight of the fabric used in the calculation. In reality, the weight of the alternative fabric may be different, which affects the actual emissions. However, this assessment provides guidance in the comparison between fabric materials.
