

Nest

SPACE WITHIN SPACE

Design Petteri Häkkinen & ISKU Team

Nest is a fun space that offers acoustic protection for studying or working. This cabin-like solution works as a space divider where you can hide for a while in your own peace.

Frame of the Nest is made of plywood. Fireproof foam acts as an acoustic element. The sides, background and roof can be selected in different colors. Nest is available with one or two sofas or just as it is without any soft seating. The sofas can be equipped with a socket. Adjustable legs.
