

TUTTO LINEA

BEAM SEATING

Design ISKU Team

Tutto Linea is a modular beam seating system designed for shared and public spaces such as lobbies, waiting areas, healthcare environments, and common areas in offices and schools. The system is available in two-, three- and four-seat configurations, with or without armrests. Configurations can be complemented with a table module and integrated power options. The seats are available in laminate or with an upholstered seat. The legs and armrests are made of powder-coated aluminum.

Materials and finishes

Frame	Powder-coated aluminium: white, black or aluminium.
Seat	ISKU standard laminates: white, black, light grey, oak, birch or beech.
Seat upholstery	ISKU standard fabric collection.
Table top	Laminate: white, light grey, birch, oak or black.

Dimensions

See the datasheet for dimensions according to the selected configuration.

Tutto Linea

BEAM SEATING

Datasheet

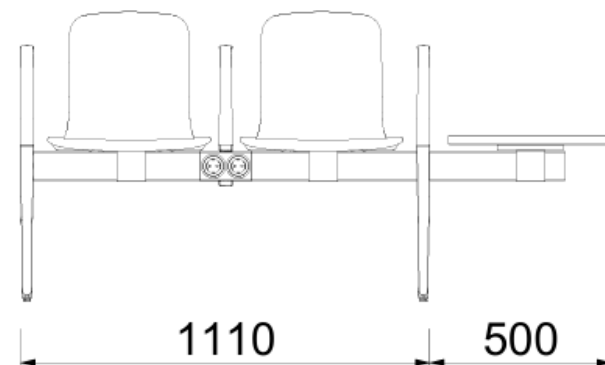

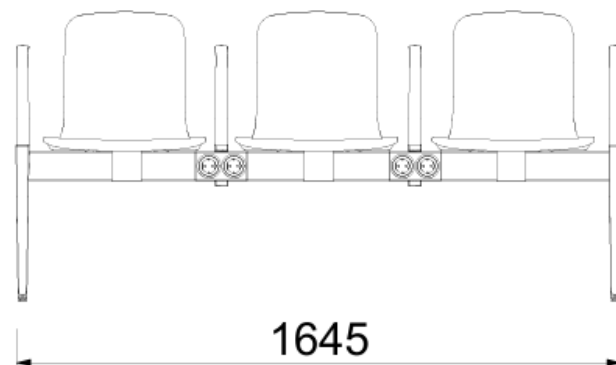

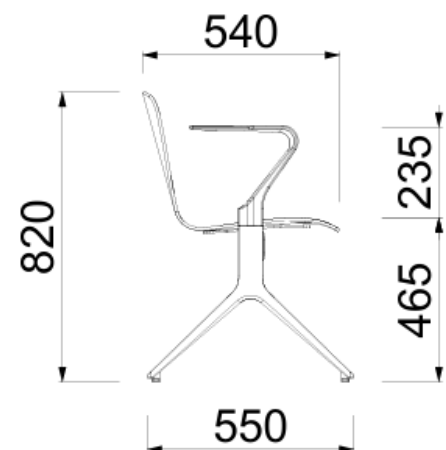

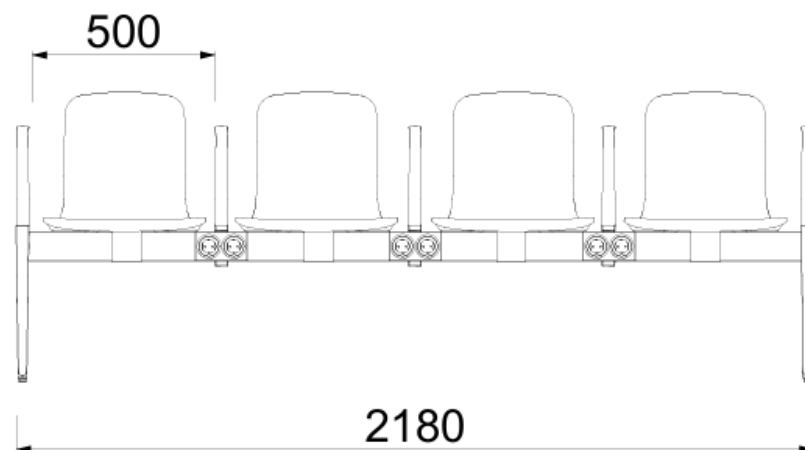

Tutto Linea is available in two-, three- and four-seat configurations. Its modular structure allows different combinations of seats, armrests and tables to suit the intended use.

Tabletop 450 x 450 mm, rounded edges

Integrated power outlets.
